A face-pack cream is obtd. using a compsn. contg. (wt.%): amine oxide (2-7); burnt alum (2-7); H₂O₂ (2-7); water-alcohol-glycerine extracts of sea buckthorn (3-6) and hops (3-6); aq. ammonia (1-5); monoglycerides (3-10); protein hydrolysate (0.1-1.0); monoglycerides (3-10); protein hydrolysate (0.1-1.0); citric acid (0.1-1.0); perfume (0.1-1.5); dye (0.0005-0.05); lanolin (1.0-5.0); distilled water (20-40); and soap shavings (balance).

USE - The compsn. is used in cosmetics.

ADVANTAGE - The mild cleansing cream is suitable for normal or combination skin which improves water-retention properties.

The cream cleanses and softens the epidermis and displays antiinflammatory action towards pimple rash.
